SPECIFICATIONS & SCOPE OF WORK:

The primary intention of this contract is to provide up to three (3) three-person crews for 40 hours/week to clear trees, brush and debris away from power lines and/or out of street and alley right-of-ways within the City Limits of Claremore. Some work may be required outside the city limits within public right-of-ways or easements.

The normal work hours bid shall be for a three-person crew with all necessary equipment including, but not limited to:

- Chain saws (for each crew member)
- Commercial chippers (1 per crew)
- Bucket truck (55' platform height – 1 per crew)
- Safety equipment
- Hand tools

For the 26-27 FY, we anticipate funding availability to keep two crews working continually (40 hrs/week) for the duration of the year. Funding may be available to keep a third crew working for part of the year. Additional crews may be utilized as funding becomes available.

Price bid shall be hourly and shall include all incidental costs including but not limited to:

- Crew truck(s)
- Supervisor (minimum of one International Society of Arboriculture (ISA) certified arborist). One supervisor is required for up to three crews.
- Stump herbicide treatment
- Insurance
- Overhead and profit necessary to complete the work
- If climbing is necessary to perform the required work, that shall be considered an incidental cost and will not be justification for additional compensation. All work completed shall be in accordance with ANSI A300, latest revision/edition. Contractor shall provide all necessary equipment required to complete all work in compliance with the specifications and all safety standards.

For all clearing operations, the entire easement or right-of-way shall be cleared as directed by the City of Claremore or Claremore Public Works Authority. In areas where easements are not well defined, a 10' wide strip on each side of the primary electric line shall be cleared from the ground to the sky. Trees with limbs outside the 10' strip, easement or right-of-way shall be trimmed to that line or as necessary per ANSI A300. All stumps shall be cut no higher than 2" above the ground surface and treated to prevent regrowth. A licensed herbicide applicator shall select and provide the appropriate herbicide according to the specie of tree.

The contractor shall provide all affected landowners with a 3-day (written notice if not able to contact the owner in-person) notice before beginning work. Any damage to personal property shall be repaired at the contractor's expense. All cleanup, chipping and debris removal shall be the Contractor's responsibility. The Contractor shall remove and dispose of any logs up to 18" diameter. The contractor shall be responsible for securing a dump site and disposal in accordance with all local, state and federal regulations. For logs exceeding 18" in diameter, they shall be sawed into 18" long (firewood) length pieces and stacked neatly in a location coordinated with the property owner. For any of the sawed pieces that the property owner does not want, a city crew will be available to help remove and dispose of those pieces only.

The Contractor shall be provided with maps as needed for reference to plan and complete the work. Unless re-directed by the City, the Contractor shall work in areas previously planned for work. The Contractor shall report to the department director of the city that the work is for and shall provide weekly timesheets, trim totals and spray reports. In the event that a full crew(s) cannot be provided or crews cannot work due to inclement weather, monthly billing shall be pro-rated to reflect the reduced cost.

In addition to the three-person crew cost, provide the following costs for individual equipment items that may be used periodically during the duration of the contract on an as-needed basis:

- High reach bucket truck (70' min platform) – cost/hour including personnel required (2 assumed) to operate this equipment. It is assumed that this equipment would be brought in to supplement the operations of one standard three person crew.
- Tracked off road self-propelled bucket - cost/hour including personnel required (2 assumed) to operate this equipment. It is assumed that this equipment would be brought in to supplement the operations of one standard three person crew.
- Skid steer with a mulcher/brush cutter - cost/hour including personnel required (2 assumed) to operate this equipment. It is assumed that this equipment would be brought in to be utilized independently of any other crews working.

The hourly rate for these pieces of equipment will be in addition to the standard 3-person crew rate and shall include cost of the equipment, the operator and helper (if required) and any incidentals related to that piece of equipment. Utilization of these pieces of equipment shall be at the discretion of the City of Claremore and shall be approved prior to use.

The second intention of this contract is to provide crews to complete tree clearing in the event of a natural disaster. The price bid for this item shall be hourly for one three-person crew. Note in an emergency situation that multiple crews may be requested at any time of the day or night in severe weather conditions.

Contractor shall be solely responsible for safety at the worksite at all times. All local, state and federal safety regulations shall be complied with at all times.
